Discover License Hogs in Real-Time

Find users who are checking out licenses and never giving it back. See who has the license checked out in real time, including how long they have had it. View aggregate information about user license usage.

Remotely Stop Hogging with Force Stop

Connect to workstations to kick out users who are hogging licenses remotely and discover / analyze usage of installed software. Keep track of software versioning, workstation usage, and more.

Status	Application	Package	Vendor	Launches	Duration (avg tot)
●	Acrobat Reader	N/A	Adobe	27	33.10 hrs
●	AutoCAD	N/A	Autodesk	29	84.37 hrs
●	CATIA	N/A	Dassault Systems	57	66.65 hrs
●	Chrome	N/A	Google	40	61.57 hrs
●	Excel	Office Professional Plus 2010	Microsoft	27	30.62 hrs
●	Firefox	N/A	Mozilla	0	0 hrs
●	InfoPath	Office Professional Plus 2010	Microsoft	0	0 hrs
●	Java	N/A	Oracle	26	32.68 hrs
●	Microsoft Access	Office Professional Plus 2010	Microsoft	0	0 hrs
●	NX	N/A	Siemens	0	0 hrs
●	Office Picture Manager	Office Professional Plus 2010	Microsoft	0	0 hrs
●	OneDrive for Business	Office Professional Plus 2010	Microsoft	0	0 hrs
●	OneNote	Office Professional Plus 2010	Microsoft	0	0 hrs

Fifteen Minute Installation Process

1. Install the virtual appliance into your datacenter
2. Connect sources (e.g. FlexLM, Sentinel, Active Directory etc)
3. Immediately visualize and manage software usage

Everything You Need for Network License Management

- ✓ See who is hogging licenses in real-time
- ✓ Discover which licenses aren't being used
- ✓ Graphs, logs, and comprehensive reporting
- ✓ Active Directory Integration
- ✓ FlexLM / FlexNet
- ✓ Sentinel SuperPro, RMS, LDK, HASP
