

# Join the StacksWare Partner Network

StacksWare is application discovery reinvented. Our platform continuously inventories and meters software applications across your environment, allowing you to make critical decisions in response to end user activities and software usage trends.

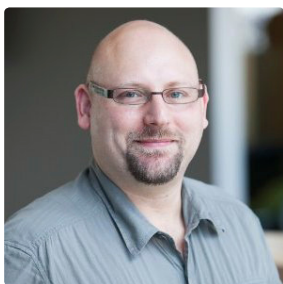

## Product Features

- Designed to support physical workstations and all hypervisor environments such as VMware ESXi, Hyper-V, and Citrix XenServer
- Track and optimize software licensing to avoid painful audits from vendors like Microsoft and Adobe
- Receive notifications instantly when critical application crash or insecure/suspicious launches in your environment

## Partner Benefits

StacksWare partners include our global network of resellers and distributors. Our shared mission: to deliver instant application visibility to the modern IT enterprise. Since our general availability at VMworld, we have viewed partners as critical to our success. As a partner, you receive unparalleled access to the following resources.

- High commission
- Unlimited internal use for lab testing
- Dedicated 24/7 technical support from StacksWare founders and engineers for all customer deployments
- An intuitive 15 minute deployment process and rapid time-to-value to drive quick sales cycles
- Case studies, PR, and webinar programs to increase your presence as a trusted partner in the virtualization community

## Partner Testimonial

You gain a trusted ally with StacksWare. The StacksWare team has provided unparalleled technical support and guidance during our customer installations. With StacksWare you get a partner that works with you to accommodate customer wishes and we can rely on them to deliver consistent value to our customers with a simple 15 minute deployment.

**Henrik Mikkelsen**  
CTO, Loop Partners
